

NXN All-Time Team-by-Team Results

Nike Cross Nationals (NXN) began in 2004 as a way to determine the best cross country team in the nation. Initially, an invitation only process was used to get teams in the meet. In 2007, a regional qualifying system was implemented with 8 regions across the country and California's state meet to determine the teams in the meet. At NXN (and NXR) teams are identified by their club names and not their school names. Club names typically are geographically based. Below are all of the team places at NXN along with number of appearances and schools identified along with their club names. **2017 qualifying teams are highlighted in yellow.**
